Executive Summary

Cloud and DevOps Engineer with 3 years of experience in cloud infrastructure mainly with Azure and AWS, includes creating and maintaining CI/CD pipelines, building and managing Docker images, deploying applications on Kubernetes. Seeking opportunities to enhance skills and contribute to business growth.

Technical Skills

Cloud Platforms	: AWS, Azure
Continuous Integration Tools	: Jenkins, Azure Pipelines, Github Actions
Containerization Tools	: Docker, Docker Compose
Container Orchestration Tools	: Kubernetes, Docker Swarm
Infrastructure as Code	: Terraform
Configuration Management Tools	: Ansible
Version Control System	: Git, GitHub, Azure Repos
Repository Management Tools	: Nexus, Azure Artifacts
Web Server & Load Balancer	: Nginx, Ingress Controller, ALB
Monitoring Tools	: Prometheus, Grafana
Quality Management Tools	: SonarQube, Trivy, NPM Audit, MendBolt, Snyk, OWASP ZAP and Burp Suite
Scripting	: Shell Scripting, Batch Scripts
Operating Systems	: Linux, Windows
Build Tools	: Maven, NPM
Application Server	: Apache Tomcat
Endpoint Management Tool	: Microsoft Intune

Professional Experience

Fintuple Technologies

Cloud and DevOps Engineer - March 2024 – Present

- Design and maintain CI/CD pipelines using **Azure DevOps**, **Jenkins**, and **GitHub Actions** for Java Spring Boot, Angular, Next.js, and Nest.js applications..
- Managed **Azure Kubernetes Service (AKS)** cluster deploy containerized applications using Docker, Docker Compose and Kubernetes, implemented **Ingress Controllers with NGINX**, and ensured **99.95% uptime**.
- Automated AKS cluster scaling and lifecycle tasks (shutdown/startup) using Azure Automation, leading to 30% monthly cost savings.
- Configured **RBAC in Microsoft Entra for Azure**, improving security posture and simplifying access management.
- Deployed containerized applications using **Azure Container Registry (ACR)** and Docker hub, maintaining consistent images across **4 environments** (DEV, QA, UAT, and PROD).
- Troubleshoot deployment and infrastructure issues across **Kubernetes, pipelines, and Azure resources**.
- Integrate **SonarQube, Trivy, NPM Audit, Mend Bolt** into Azure pipelines for security and quality checks.
- Manage application artifacts using **Azure Artifacts** and maintain source code using Git, GitHub, and Azure Repos.
- Work with **Docker Compose** for containerized application deployments and local/development environments.

Cloud and DevOps Intern | October 2023 – March 2024

- Developed and maintained CI/CD pipelines using Azure DevOps for application build and deployments.
- Performed application builds, deployments, automation, and troubleshooting across development environments.
- Worked with containerized applications and cloud deployments.

Projects

Digital Custody Initiative - ICICI Bank (Azure)

- Designed and maintained Azure DevOps CI/CD pipelines for automated builds, testing, and microservice deployments across multiple environments.
- Worked with **Azure services including Virtual Machines, Azure Key Vault, Azure App Configuration, Azure Kubernetes Service (AKS), Azure Event Hubs, and Azure Service Bus.**
- Supported a three-tier architecture with **NGINX** on an Azure VM, containerized workloads on **AKS**, and **MySQL** as the database layer.
- Managed AKS Deployments, Services, Pods, Ingress, and Secrets and configured NGINX Ingress Controller.

Foreign Custody - Kotak Mahindra Bank (AWS)

- Built and maintained Azure DevOps CI/CD pipelines for application build, deployment, and release automation.
- Supported a three-tier architecture with traffic flowing **Route 53 → EC2/NGINX → ALB → EKS**, with MySQL as the database layer.
- Containerized applications using Docker, managed images in **Amazon ECR** and **Docker hub**, and deployed applications in Amazon EKS.
- Configured **AWS Load Balancer Controller/Ingress**, managed secrets using AWS Secrets Manager.
- Integrated **Trivy** vulnerability scanning into CI/CD pipelines to deploy a healthy docker image.

Nivruti NPS - SBI (Azure)

- Managed three Azure Virtual Machines supporting the **Web, Application, and Database** layers.
- Deployed containerized applications using **Docker** and **Docker Compose**, including application services and supporting infrastructure.
- Used **PostgreSQL** as a containerized database with persistent storage and deployed **MinIO** as a service for object storage
- Managed Docker Compose networking, volumes, and service dependencies and troubleshoot container, database, VM, networking, and storage issues.

UAE Client Onboarding - Barjeel(Azure)

- Built and maintained CI/CD using **Azure pipelines** for automated application build and deployment.
- Managed application workloads on Azure Virtual Machines and deployed containerized applications using Docker Compose.
- Managed container configurations, **networking, volumes, and service** dependencies across application deployments.
- Troubleshoot **Docker, Azure VM, networking**, and application deployment issues across environments.

Products - Agenix, Watchtower, Wealthserv 2.0 and Enable (Azure)

- Built and maintained **GitHub Actions** CI/CD workflows for automated build, deployment, and release activities across the three products.
- Managed application workloads on Azure Virtual Machines and deployed containerized components using Docker Compose.
- Managed container configurations, networking, volumes, and service dependencies using a common Azure-based architecture.
- Supported application releases and troubleshooting across Docker, Azure VMs, networking, and deployment workflows.

Academic Profile

2019–2023

B.E – Electronics and Communication Engineering

Hindusthan Institute of Technology, Coimbatore.

CGPA: 8.3
